TECHNOLOGY RISK MANAGEMENT

STRENGTHENING ENTERPRISE SECURITY FROM THE CORE

Building on our strategic and compliance expertise, our Technology Risk Management services strengthen the core of enterprise security. From advanced vulnerability assessments and threat simulations to secure architecture and incident response, we help organizations proactively manage cyber risks. As technology landscapes evolve, our specialists secure cloud, IoT, OT, and DevSecOps environments—enabling innovation that is resilient, compliant, and future-ready.

DATA PROTECTION AND PRIVACY

BUILDING TRUST THROUGH DATA PROTECTION EXCELLENCE

In an era where data is the most valuable asset, our **Data Protection & Privacy** services help organizations embed privacy at the heart of their operations. We enable compliance with Indian and global regulations such as DPDP, GDPR, and CCPA through robust frameworks, impact assessments, and governance models. Our experts design and operationalize privacy programs that balance regulatory assurance with business agility—ensuring trust, transparency, and accountability across every data touchpoint.

OUR KEY OFFERINGS

Privacy Policy Development & Governance

Creating, reviewing, and updating policies aligned with regulatory requirements and geographical jurisdictions

Privacy by Design

Integrating privacy controls directly into business processes, systems, and products from the outset

Compliance Assessment (DPDP, GDPR, CCPA & Global Regulations)

Assessing organisational controls and alignment with national and international data protection frameworks

Privacy Impact Assessments

Evaluating risks associated with data processing activities and ensuring effective mitigation

END-TO-END DATA PRIVACY SERVICES

Privacy Management System Readiness

Preparing organisations for structured and compliant privacy program implementation

OFFENSIVE SECURITY

RED TEAM & ADVERSARIAL SIMULATION

Service	Description
Red Team Operations	Full-scope, multi-vector, stealth-based attack simulation targeting a specific business objective (e.g., steal a specific data set) to test the people, process, and technology aspect of organization.
Breach & Attack Simulation (BAS)	Automated or semi-automated execution of pre-defined attack scenarios, often mapped to the MITRE ATT&CK framework, to continuously test security control efficacy.

APPLICATION & PRODUCT SECURITY (APPSEC)

These services focus on the integrity and security of custom software and APIs.

Service	Description
Web Application Penetration Testing	In-depth manual and automated testing of websites/web applications looking for flaws like SQL Injection, XSS, and logical flaws.
Mobile Application Testing	Testing of the client-side app (iOS/Android) and the backend APIs it communicates with, including local data storage and transport security.
API Penetration Testing	Specialized testing for REST, SOAP, and GraphQL APIs, focusing on authorization, authentication, rate limiting, and business logic flaws.
Secure Code Review (SAST)	Reviewing the application's source code to find security vulnerabilities before the application is even deployed.
Security Architecture/ Design Review	Proactive review of the application's design, architecture, and threat model before development begins (" Secure-by-Design ").
AI/ML/LLM Application Testing	Testing for vulnerabilities in AI-powered applications, such as prompt injection and data poisoning.

NANGIA & CO LLP

NETWORK & INFRASTRUCTURE SECURITY

These services target the traditional IT and corporate environment

Service	Description
External Network Penetration Testing	Testing the organization's internet-facing perimeter (firewalls, VPNs, mail servers, and DNS) from an outside attacker's perspective.
Internal Network Penetration Testing	Testing the internal corporate network to simulate a breach or insider threat, focusing on privilege escalation and lateral movement.
Wireless (Wi-Fi) Security Assessment	Assessing the security of the corporate and guest wireless networks, including authentication protocols and rogue access point detection.
Configuration & Hardening Review	Reviewing the security settings of critical devices (servers, firewalls, routers) against industry benchmarks (e.g., CIS Benchmarks).
Vulnerability Assessment (VA)	Automated scanning to identify known software vulnerabilities and misconfigurations across the network.

CLOUD SECURITY

These services are essential given the massive shift to public cloud environments.

Service	Description
Cloud Penetration Testing (IaaS/PaaS)	Exploiting vulnerabilities within a cloud environment's infrastructure (AWS, Azure, GCP), focusing on tenant isolation and lateral movement.
Cloud Configuration Review (SaaS/IaaS)	Auditing the security configuration of cloud services (e.g., S3 buckets, security groups, IAM policies) against best practices and compliance.
Container & Microservices Testing	Assessing the security of container runtimes (Docker/Kubernetes), images, and the underlying orchestration platforms.

SOCIAL & PHYSICAL SECURITY (THE HUMAN ELEMENT)

Service	Description
Phishing & Social Engineering Campaigns	Simulated email phishing, spear-phishing, smishing (SMS), or vishing (voice) attacks to test employee security awareness.
Physical Intrusion Testing	Simulating unauthorized access to an office, data center, or facility to test physical security controls (e.g., tailgating, badge cloning).

OT / ICS & PHYSICAL SECURITY

Service	Description
ICS / SCADA Assessment	Specialized cybersecurity assessment for Operational Technology and Industrial Control Systems.
OT Network Security	Review of network segmentation and boundary protection for industrial environments.
